SeyInsure Insurance Brokers

Working with SeyInsure

Business insurance

Send a description of your business, the property or activities you want to insure and your preferred start date. Your broker can help gather the information needed to approach insurers.

Personal insurance

Tell your broker what you would like to protect and whether you need new cover or a renewal review. Have your existing schedule available if you already hold a policy.

Claims

Report the incident through your portal. Include the policy reference, date and a short description. Keep photographs, receipts and correspondence for your broker.

Working with a referral partner

With the client’s permission, submit their name, contact details and insurance need through Referrals. Check the enquiry status and any document requests in your partner portal.
